

# Do-It Corporation's Hang Tab Helps Getagadget Super Flyer Disk Reach New Heights

Getagadget of Austin, Texas was searching for an additional way to display their "Super Flyer" flying disk. Do-It Corporation's printed, R-EAD hang tab works well for Getagadget. The disk is usually displayed in bins or on a shelf. The hang tab provides the added retail display option of hanging the product anywhere in the store.

The colorfully printed R-EAD is easily applied and holds securely to the disk with Do-It's standard 203-A adhesive.

After purchase, the hang tab can be removed cleanly leaving no adhesive residue.

Any product can benefit from increased display options. Even large, brightly colored products like flying disks.
