

Custom Stuffed Tees, A Bottle of Jim Beam, and Do-It Corporation

Attaching a T-shirt to a bottle of whiskey isn't something that happens every day. But when the creative people at Custom Stuffed Tees needed help securing a compressed T-Shirt to a bottle of Jim Beam Bourbon they came to Do-It Corporation.

The shrink wrapped, compressed shirt is designed with a hole down the center to slide over the neck of the bottle.

Do-It's RAN Bottle Neck Hang Tab fits tightly over the cap and helps secure the package to the bottle. Now the T-shirt is less likely to be separated from the bottle before purchase.

The bottle neck hang tab adheres to the top of the compressed T-shirt package.

The bottle neck hang tab hole grips the bottle neck securing the package.
