Turtle Wax Boxes

Do-It Security Seal Tabs keep your product package secure, are easy to apply, and are more durable than thinner, wafer-style seals. That is why Turtle Wax uses Do-Corporation's UCD Seal Tab on a variety of their boxed products.

The clear, UCD seal tabs doesn't block any key product information and can be used where needed — on the top, side, or bottom of the box. The 10 mil thickness and Do-It's aggressive

proprietary HangTite adhesive means Turtle Wax can be confident their product will remain sealed until after purchase.

Do-It offers a variety of products that can seal, seal-and-reseal, and even hang and seal your product. Do-It Seal Tabs are a clean and convenient way to assure the integrity of your products in any retail environment.

Do-It's UCD Seal Tabs are made in several plastic materials and thicknesses – to meet your performance requirements.
